

OSFM Explanation of Eligibility

Regardless of which state you are a resident of, Oregon law restricts cardlock gasoline to specific users. If you wish to dispense cardlock gasoline in Oregon, **ALL** of following must apply:

- All Oregon cardlock gasoline must be used exclusively for your business. All personal use is prohibited, even if the vehicle is owned by your business.
- You must purchase a minimum of 900 gallons of gasoline and/or diesel during any 12-month period (if gallons with Wilcox and Flegel are less than 900 gallons, proof such as receipts or invoices from another source will be required).
- Wilcox and Flegel must receive the completed **“Oregon Commercial Fuel Dispensing Agreement” AND proof of business**. Examples of proof of business: Federal Identification Number (not a social security number), Business License, Contractors License, Commercial Fishing License (current copy required upon expiration); Copy of previous year’s Schedule “C” or “F” from your income tax return (current copy required annually). For this purpose, a Washington UBI number or Master’s License is not accepted by the Oregon State Fire Marshal.

The Oregon State Fire Marshal audits our records regularly as well as visiting the cardlock sites. If a transaction occurs that is not within the limits of the law you could be penalized up to \$500.

Cards on your account with access to gasoline, (whether they will access other products or not) will not currently access any product (gas or diesel) within Oregon but may be used outside Oregon. Those cards will be activated in Oregon once Wilcox and Flegel receives the Oregon Commercial fuel Dispensing Agreement and proof of business.

Cards that are restricted to diesel will currently work in any state, including Oregon.

If you have questions, please contact our cardlock department at 360-578-4291 or email cardlock@wilcoxandflegel.com. You may also contact the Cardlock Unit at the Oregon State Fire Marshal’s office at (503) 378-3473.
